

Satellite Policy

Effective: January 2012

Remember any requests need to be in writing and submitted to management company before installation.

1. The dish cannot be placed on any part of the building(s) which includes the roof nor on the fence.
2. The satellite can be placed on a pole in the patio area. The pole must be placed out of eye sight and the satellite dish cannot exceed 12 inches above the top of the patio fence.
3. All wires must be tucked in and blend with the buildings.
4. The homeowner is responsible for any type of property damaged caused by the satellite dish/pole and will be responsible for the removal of such when service is terminated or of any kind of maintenance has to be done and it is impeding such service.
